

ASEAMAC

**Spanish Rental Association
for the Construction, Services and Industry
without Operator**

ERA Convention 2009 – Manchester - 26-27 May 2009

Introduction

- From its foundation in 1996, ASEAMAC has grown to currently become the main representative association of the rental equipment sector without operator in Spain.
- The main objective of ASEAMAC is to represent, defend and promote the general interests of their associate members.

Members

- ASEAMAC bring together at the main Spanish Companies of Rental Equipment for the Construction, Services and Industry without Operator:
 - 93 companies.
 - 300 rental locations distributed all over Spanish geography.
 - Represents 74 % of the Spanish Rental Equipment available.

Activities and services

- Institutional representation.
- Information and documentation.
- Projects.
- Collaborations.

Institutional representation

- ASEAMAC aims at representing and promoting their members before government agencies and related institutions and lobby on their behalf in matters concerning the Industry.
- ASEAMAC participates in those forums where it is necessary to defend the position of the rental companies.
- ASEAMAC is member of ERA (European Rental Association) and AENOR (Spanish Association for Standardisation and Certification).

Information and documentation

- ASEAMAC maintains informed to their member ones on all those national and communitarian normative developments that can affect the activity of the rent.
- ASEAMAC collaborates with Spanish Organisms and Institutions in the adoption of national regulations and participates actively in different Committees for Standardization in the development of standards related to the sector.

Information and documentation

- ASEAMAC serves of legal consultant's office (civil, penal, administrative, mercantile, etc.) and technique (marked EC, prevention of labour risks, environment, etc.).
- ASEAMAC organizes workshops on legislative spreading.
- ASEAMAC drafts documents of interest for its members (model type of rent contract, etc.).

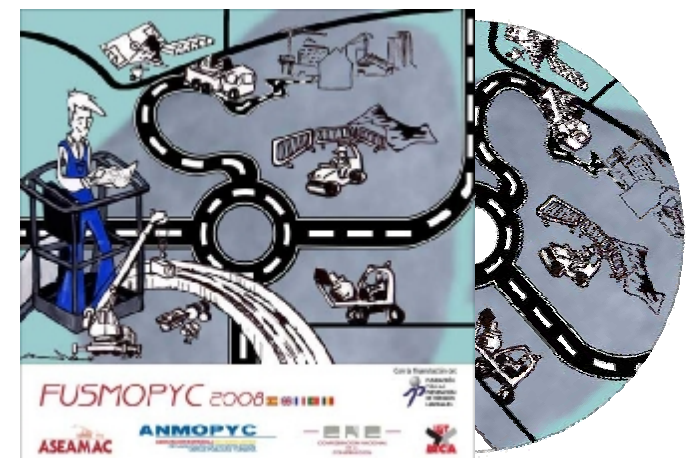

Projects

- From ASEAMAC one foments the development of projects and strategies directed to the improvement of the conditions of security and quality of the services that the associate companies lend their clients.

Projects

- Elaboration and diffusion of a **collection of 65 Practical Leaflets** for the Safe Use of Rental machinery.
- Participation of associations of manufacturers (ANMOPYC) and construction companies (CNC), labour unions (MCA-UGT) and institutions (Foundation for Occupational Risk Prevention).
- It is available in Spanish, English, French, Portuguese and Romanian.
- Distribution of 5.000 Cd-Rom.
- Available online for free.

Projects

- Development of a **system of management to facilitate the recovery of removed machinery**, fruit in the agreement of collaboration subscribed with the Forces of the Public Order (Civil Guard, National Police, Local Police, etc.).
- Creation of a **Late Payment File** for our sector in order to mitigate the impact of the dilatoriness in the commercial relations of the our associate companies.

Collaborations

- Establishment in agreements with companies that provide different services of interest from our associate companies (insurances, formation, etc.).
